

Programmes Overview

Our Specialist Areas - where we can help

Our services	Where we help	What we do
1. MAOS Approval Services	Do you need support to achieve regulatory approval efficiencies?	We offer up to date MAOS regulatory knowledge and expertise to lead and support you through your approval preparation from start to finish, freeing you up to focus on managing your other challenges.
2. Quality Assurance services	Could fresh eyes see things that perhaps you don't	We will add value to your company by providing highly experienced, independent auditors – skilled, experienced, objective and offering fresh eyes and completing penetrating process and product audits.
3. Regulatory Advisory services	Would you benefit from access to the right expertise to stay up-to-date?	We will answer all of your questions relating to regulatory interpretation and compliance, saving you the hassle of research, study and following complex cross-reference trails. Our daily interaction with the European Airworthiness Regulations means we can usually give you an immediate response.
4. Management Coaching services	Better managers deliver better results - considered investing in your managers to make them more successful?	Our coaches are there to provide agreed personal development to your key managers. They are focused to listen to your requirements, to answer questions, to challenge, to inspire and to encourage your managers
5. Steering Group Advisory services	Are your business and safety risks under control - do you need access to regular independent expert advice or a fresh perspective?	We provide directors with analyses to assist in the review; evaluation, approval and monitoring of corporate air safety and airworthiness activities.
6. Maintenance Error Investigation services	Are you learning from your organisation's errors? Do you have an effective error investigation resource	Our fresh eyes will see things that perhaps you don't. We will add value to your company by identifying the real error causal factors, providing valuable recommendations, based on industry best-practice.
